## Township of Langley DRINKING WATER INFRASTRUCTURE

The Township of Langley takes pride in providing a reliable, efficient, and safe drinking water system for our community. Water services and infrastructure are funded through the rates collected by the Township from residents and businesses.

**POPULATION GROWTH**

2017: 106,000  
forecast 2031: 186,000

has increased demands on the drinking water system and more funding is required to maintain, renew, and replace the ageing infrastructure

over 80% of residents rely on the Township's water infrastructure

**THE TOWNSHIP'S WATER SYSTEM has grown to include:**

- 491 km of Water Mains (Langley to Portland)
- 2533 Hydrants
- 18,660 service connections
- 12.8 billion liters Volume of water delivered in 2015 (filling up BC place 5x)

...and many more

**\$340 million** replacement cost for the drinking water infrastructure

**\$1.19** average amount a residential will pay per day for water in 2013

**3.4 million** Additional estimated annual replacement funding required.

**CONDITION OF INFRASTRUCTURE**

- 8% NEW POOR
- 22% POOR
- 70% GOOD

An increase in infrastructure funding is required to continue supplying safe drinking water now, and into the future

# Hybrid work statistics to power your business policies

Strategic importance of hybrid work

**Remote desktop adoption rates for hybrid workers**

- 43% reported that over 50% of their staff actively use remote desktops.
- 34% said remote desktops were in use for less than 50% of staff
- 13% were either looking into implementation, or already trialing it
- 9% reported no interest in the technology

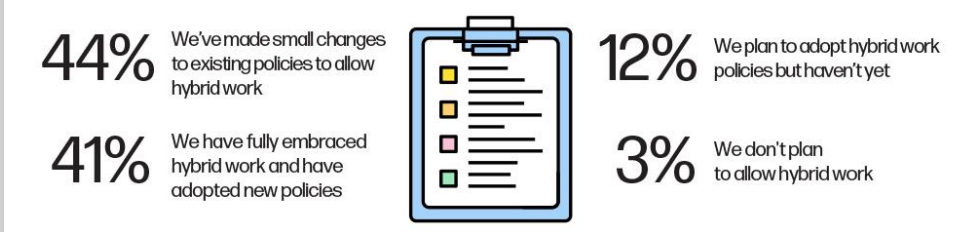

**Challenges experienced with implementing or managing remote desktops**

- 59% Performance/user experience issues
- 34% Cumbersome maintenance or management
- 32% Difficult implementation process
- 25% Staff adoption of the technology
- 17% Internal buy-in during evaluation

Benefits companies have gained from enabling hybrid work during the pandemic

How have your company's policies changed to incorporate hybrid work?

# Understanding digital workspaces

As hybrid workplaces have become commonplace, businesses have begun adopting digital workspaces to remain flexible and productive.

**What is a digital workspace?**  
 A digital workspace is a secured, work-from-anywhere, integrated technology framework that can deliver, manage and control centralized company assets, including applications, data and desktops.

**Who needs a digital workspace?** Power users and creative professionals, Knowledge workers, Contract workers

**What hybrid work needs do digital workspaces solve?**

- Security:** Reduce security risks by remotely accessing digital workspaces using PCoIP technology.
- Collaboration:** Keep collaborating with digital workspaces that offer screen sharing and peripheral support.
- Bandwidth:** Digital workspaces access software can adapt to variable connections.
- Peripheral support:** Digital workspaces include peripheral support for artists to work effectively from anywhere.
- IT flexibility:** IT can remotely administer digital workspaces to create and manage secure connections.

Digital workspaces use cases

- Disaster recovery:** Digital workspaces ensure that employees can work securely and productively from anywhere.
- Economic crises:** Reduce company expenses and protect employees' health by implementing digital workspaces.
- Be OS-agnostic:** Digital workspaces offer a virtually seamless experience across various operating systems.
- Secure training environments:** With just an internet connection, users can remote into a training session hosted on digital workspaces.
- Physical to virtual workstations:** Users aren't tied to a physical location as digital workspaces give them virtual access from anywhere.
- Public cloud infrastructure:** Digital workspaces using public clouds can be deployed rapidly, inexpensively and at scale.

## Unlock the Future of Enterprise Connectivity with GXC's Private 5G Solution

GXC's Private 5G Solution addresses critical enterprise communication needs with a scalable, secure, high-performance network that minimizes downtime. It offers exclusive network control for data protection, supports real-time processing with dedicated bandwidth and low latency, and simplifies operations with robust, centralized management.

### Why Choose GXC Private 5G?

- Enhanced Performance**  
Uninterrupted high bandwidth connectivity for 4K Video & AI applications.
- Advanced Security**  
End-to-end encryption and access management keeping your data secure.
- Flexible Platform**  
Built for enterprises from the ground up, designed to integrate and scale with industrial applications.

### What Sets Us Apart?

Our Patented Cellular Mesh Technology

Utilizing patented interference cancellation, GXC's technology provides cellular wireless backhaul and access, making it ideal for areas where cabling is challenging or cost prohibitive, ensuring robust and complete on-site coverage.

<b>GXC Onyx Edge with 5G Standalone Core</b> Independent Operation Enhances control and reliability while reducing latency, with no external network dependencies. Enhanced Security & Performance Guarantees data integrity and real-time processing for seamless operations. Backward Compatibility Smoothly integrates and operates with both LTE and 5G Access Points across various network technologies.	<b>Innovative 5G Access Points (APs)</b> New O-RAN based APs GXC's APs leverage ORAN technology for enhanced flexibility & performance. Fronthaul Multiplexer Combines 5G signals into a large, high-performing network, reducing costs and complexity. Optimized Frequency Management Innovative frequency & bandwidth management for maximum performance using limited resources.	<b>Centralized Network Management System (NMS)</b> Unified NMS View All network functions available from a single GUI. Simplifies monitoring and management, as easy to manage as enterprise WiFi. Faster Troubleshooting Minimizes downtime and enhances operational efficiency. Streamlined Management Enables network administrators to effectively manage and optimize performance, crucial for cost-efficient enterprise operations.

## Synergistic Advantages of Private Cellular and Mesh

### Secure, Flexible, and Reliable Connectivity for Enterprise, Industrial, Agricultural, and Outdoor Applications

## WAREHOUSING & LOGISTICS

Enabling a world that can trust wireless connectivity to be simple.

GXC ONYX is a comprehensive private cellular network for warehouses, providing secure, low-latency connectivity essential for efficient operations. It enables seamless IoT integration, real-time inventory management, and M2M communication. Leveraging data analytics, GXC ONYX drives predictive maintenance and operational optimization. Its security protocols ensure data integrity, while the scalable mesh architecture supports evolving warehouse demands, offering a future-ready infrastructure that's easy to deploy and manage.

### Benefits of GXC ONYX

- Improve Efficiency**  
Create faster, more reliable communications and operations, reducing downtime and costs
- Secure Data**  
Ensure data is collected reliably and securely, without interference from other networks or devices
- Complete Coverage**  
Provide unparalleled connectivity and coverage at a low-cost vs. public networks, satellite or Wi-Fi
- Cost Effective**  
Lower network management cost, reduce downtime, and optimize energy usage and waste

### Use Cases for Industrial Manufacturing

- Real-time inventory management
- Indoor navigation for vehicles and robots
- Real-time workforce monitoring and communication
- Warehouse automation and control
- Warehouse management system (WMS) integration
- Warehouse robotics communication and control
- Augmented Reality (AR) guided picking
- Warehouse security and access control
- Enhanced safety and security systems
- Network segmentation for sensitive information

### Mesh Delivers Connectivity Anywhere

GXC offers the world's only patented mesh-based private cellular network, providing the industry's most versatile deployments. Experience the advantages of GXC's innovative approach:

- Rapid, cost-effective network deployment
- Easily move, relocate, or repurpose your network
- Rural internet access without LAN/fiber installed

### Get Started Today

Contact us today to request a personalized demo or learn more about our solutions. Let's explore how our innovative technology can transform your business and drive your success. Don't miss out on the opportunity to elevate your operations—reach out to us now!

[www.gxc.io](http://www.gxc.io)  
[info@gxc.io](mailto:info@gxc.io)

## Take the Network Anywhere with Mesh Technology

The GXC private cellular network leverages patented interference cancellation to connect access points in a self-forming, self-healing wireless mesh network. It offers seamless cellular coverage using mesh technology across CBRS and sub-6GHz spectrums, ensuring robust on-site, expansive connectivity.

### Private Cellular Mesh Networks Deliver Essential Capabilities for Mission-Critical Business Applications.

- SPEED/BANDWIDTH**
- COST ADVANTAGE**
- FULL COVERAGE**
- MOBILITY**
- LATENCY**

Discover how GXC's mesh network technology seamlessly integrates into your enterprise, providing encrypted security, effortless scalability, and simple deployment for a robust and adaptable connectivity solution.

- ENCRYPTED SECURITY**  
GXC mesh nodes seamlessly enhance enterprise security within our private LTE and 5G network platform, ensuring data integrity, end-to-end encryption, and unparalleled reliability.
- HIGHLY SCALABLE**  
A self-organizing mesh network quickly scales by simply connecting a node to power, instantly enhancing coverage. With multiple data routes per node, the network is highly scalable and resilient.
- EASE OF DEPLOYMENT**  
Mesh-enhanced private cellular networks let enterprises easily expand coverage with wireless nodes, offering a flexible, cost-effective solution in areas unsuitable for traditional cabling. Adding or moving a node is as simple as connecting it to power.

[www.gxc.io](http://www.gxc.io)

## GXC Mobile Kit (GXC-MKTC-001) QUICK START GUIDE

### 1 Activate your ONYX Portal account

Refer to the email from GXC to verify your email address and set your password.

This system has been preconfigured so that once you cable, power, and provide access to the internet, it will communicate with the ONYX Portal.

You will be able to use your credentials to login and start using your GXC Mobile Kit.

If you should have any questions, contact GXC Technical Support by email at [support@gxc.io](mailto:support@gxc.io).

Log on to the ONYX Portal  
<https://portal.gxc.io>

- To view ONYX Help documents, click the (?) icon in the header area of the ONYX.
- To submit a ticket with GXC Technical Support, click the (?) icon in the header area of the ONYX Portal interface.

### 2 Cable up the equipment

- Insert the AC to DC power adapter connector into to the rear of the Mobile Kit (arrow side up). Verify that it clicks into place and the Mobile Kit power LED illuminates.
- DO NOT press the Gateway Power button until all connections are completed.

### 3 Apply power

- Power on the Mobile Kit by pressing the Gateway Power button.
  - The power button should illuminate.
  - The complete boot process and registration with the ONYX Portal should take about 10 minutes.
- Check that the LED indicators on the G100 are illuminated as expected.
  - It may take up to 10 minutes for the AP to normalize and register with the ONYX Portal.

LED	Color	Status	Description
Power	Green	Ready on	Power is on
	Green	OFF	No power supply
	Green	Flashing	Power
CELL1	Green	Flashing	Data is transmitting
CELL2	Green	Flashing	Data is transmitting
	Green	Steady on	The cell has been activated
	Green	Flashing	Received
ALM	Red	Flashing	S1 alarm
	Red	Flashing	S2 alarm
	Red	Flashing	Other alarm

### 4 View equipment status

View the status of your equipment and alarms by selecting the various navigation pane icons on your ONYX Portal.

For more information  
[www.gxc.io/5g-ite-starter-kits/](http://www.gxc.io/5g-ite-starter-kits/)  
Technical Support: [support@gxc.io](mailto:support@gxc.io)

## How Does Our Solution Work?

GXC ONYX integrates seamlessly with your cellular, WiFi, and Bluetooth devices. Our pre-integrated network hardware and software support various connection methods, including RAN, Core, NMS, SIM, and SAS. Manage ONYX easily through our intuitive enterprise console.

Our patented technology uses interference cancellation to connect access points in a self-forming, self-healing wireless mesh network. This ensures seamless cellular coverage across CBRS and sub-6GHz spectrums, providing robust on-site connectivity.

- Simple to Deploy and Manage**
  - Turnkey deployment and unified enterprise management.
- Unbeatable Deployment Cost Savings**
  - Our patented Cellular Mesh architecture significantly reduces the time and cost of deployments.
- Flexible and Future-Proof**
  - Mesh technology for extending networks without wired backhaul.
  - Ruggedized equipment for indoor and outdoor use.
  - Optional 5G for advanced connectivity.
- Security and Integration**
  - Cellular-grade end-to-end encryption.
  - Extensive APIs for enterprise integration.
  - Supports existing cloud-based controllers.
  - APIs for proactive analytics and service assurance.
- Comprehensive Management System**
  - Single stop for network monitoring.
  - Direct CBRS SAS integration for frequency grants.
  - Seamless integration with enterprise infrastructure.

## Experience the Future of Connectivity with GXC

GXC's private cellular network delivers robust, reliable, industry-tailored connectivity, significantly enhancing operations and management, even in the most challenging environments.

- Industrial Manufacturing
- Warehousing & Logistics
- Extractive Industries
- Agriculture
- Venues
- Construction
- Airport Terminals & Ports
- Healthcare
- Energy

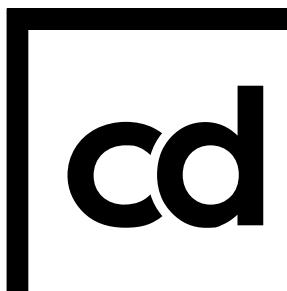

Contact us today to request a personalized demo or to learn more about our solutions. Let's explore how our innovative technology can transform your business and drive your success. Don't miss the opportunity to elevate your operations—reach out to us now!

Experience the simplicity and power of our Private 5G and LTE with GXC's Enterprise Mesh Cellular Platform. Our end-to-end, ultra-secure, fully integrated solution offers turnkey deployment, making it simple and cost-effective to integrate into your existing infrastructure.

- Comprehensive Management System
- Flexible, Future-Proof, and Secure

DATASHEET Anyware

## HP Anyware Secured Digital Workspaces

**Software Benefits**

- Deploys on virtually any IT infrastructure
- Keeps data safe within your network
- Delivers world-class remote performance
- Collaborate with others in real-time

**Software Highlights**

- AES-256 encryption of PCoIP™ traffic in the form of pixel images
- No VPN required
- Color-accurate, lossless, and distortion-free experience

**Overview**

HP Anyware is the enterprise software IT needs to keep people productive with secure access to their digital workspaces. It future proofs against ever-evolving infrastructure, network, and hybrid workforce demands with deployment flexibility for virtually any host environment or workload.

HP Anyware enables both simple and complex remote workflows for top government agencies, media conglomerates, production studios, financial firms, educational institutions, and design houses. The remote software meets top-secret security requirements while delivering highly responsive, color-accurate, lossless, and distortion-free graphics performance to and from anywhere there is network access.

Built on the same technology that won both Teradici and HP Engineering Emmys in 2020, HP Anyware creates a seamless experience for teams to interact with their digital workspaces from wherever they work best. Backing sites and outdated VPN file transfers, HP Anyware leverages the PCoIP™ protocol to stream high interactive desktop displays between virtually any host and end-user device without any data ever leaving the safety of your network.

Anyware NVIDIA OMNIVERSE ENTERPRISE

## What is NVIDIA Omniverse™ Enterprise and how does it work with HP Anyware?

**Sales Guide for the AECO Segment**

NVIDIA Omniverse™ Enterprise unites teams and their design assets in a shared virtual space, enabling diverse workgroups to collaborate on a single project file simultaneously, even when working from different software applications. With HP Anyware, team members can securely tap into Omniverse from anywhere, with the color-accurate, lossless, and distortion-free user experience needed to create and iterate together efficiently.

The workflows of architects, engineers and designers working in AECO (architecture, engineering, construction and operations) are growing increasingly complex.

- Large 3D datasets
- Many design tools
- Demand for physically accurate models
- Skilled hybrid workforce spread around the world
- With many contributors changing design files, where's the single source of truth

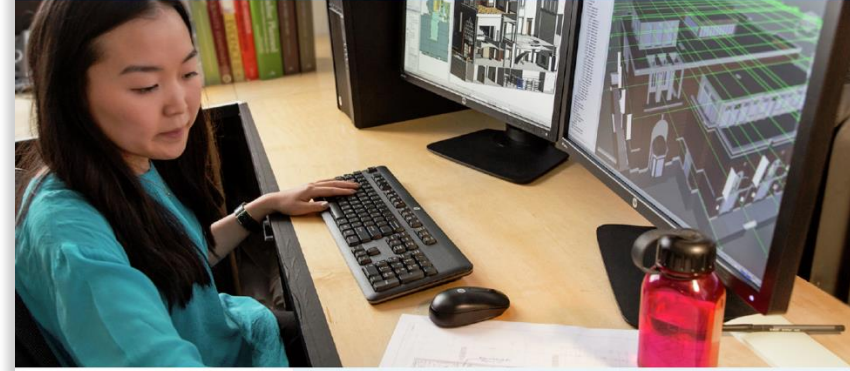

**Key Differentiating Value Prop**

Together we equip creators working simultaneously across 3D applications and project phases with the ability to collaborate in real-time with full fidelity visualization, accessed securely from virtually anywhere.

CUSTOMER CASE STUDY Anyware

## Designers access their graphics workstations from home – with crisp lines, no lag, and multiple monitors

Corpus Christi-based CLK Architects is a leading architectural firm in South Texas, specializing in healthcare, higher education, K12, and municipalities. The firm offers comprehensive architectural services, including design development, construction documents, bidding and contract negotiation, space planning, interior design, and remodeling.

“When we went home to work, about half of our team had HP Anyware while the others still had GoToMyPC. Nobody who tried HP Anyware would go back. They won't give up multi-monitor support and not having to trade resolution for smooth motion. If I rotate a 3D model from my home machine, the experience is almost exactly the same as it would be in the office.”

Javier Huerta, AIA, Principal and Vice President, CLK Architects

 CLK Architects

Using Zero Clients to Maximize Benefits of Desktop Virtualization and DaaS Initiatives

### The Benefits of PCoIP Zero Clients

The most widely used zero clients are PCoIP Zero Clients. PCoIP technology developed by Teradici compresses, encrypts and transports the desktop image hosted on a central server or workstation to remote PCoIP endpoints on the user's desk. The endpoint devices decompress, decrypt and display the image so that only pixels are transmitted, not data. And, from the user's perspective, there is no difference between working on a local computer loaded with software and working on a zero client receiving the image of the applications software running via PCoIP.

There are a number of virtual desktop, virtual workstation and DaaS solutions that leverage PCoIP technology, including VMware Horizon and Amazon WorkSpaces. PCoIP Zero Clients offer a highly secure and easy to manage way to connect enterprise users to all of these solutions.

The use of PCoIP by the leading virtual desktop and DaaS providers means that PCoIP Zero Clients have the broadest coverage in the market, giving customers many more options for pricing, features and support. More than three million PCoIP Zero Clients have already been sold and are available from more than a dozen different industry-leading hardware vendors in a range of different form factors, including integrated all-in-one monitors, laptops and standalone desktop devices.

PCoIP is widely utilized and broadly supported because, in addition to delivering ease of management, lower costs and a highly secure environment, it also delivers a rich, uncompromised virtual desktop experience for users.

Here are customer quotes on the PCoIP Zero Client experience:

**Great Performance and User Experience**

“If you have a computer it has to be able to provide a rich media experience. The intelligence of PCoIP to adapt to network changes and load demands on the fly make it a superior choice.”

“To meet our customers' expectations, we cannot afford down time with our PCs failing due to the power supply or hard drive crashing.”

**Ease of Management and Improved IT Efficiency**

“Deploying a zero client is much faster when all you have to do is unbox it, plug it in, have it auto-acquire its settings based on the policy you assign, and then go plug it in and let users start logging into it. The units are cheaper than desktops, require less power and are easier to use.”

“The ability to provide a consistent and reliable desktop throughout our organization is our ultimate goal. To be able to get to the same desktop, with the same settings and the same experience anywhere in our facility, is a huge win.”

**Improved Security and Protection of Corporate Data**

“No built-in operating system to update/patch or contend with compatibility issues.”

“With PCoIP Zero Clients [we can] quickly implement secure environments in branch offices without having to deal with full-scale PCs. They also make it much simpler to replace equipment and onboard new users. Just plug and play.”

teradici.com/zeroclients teradici

### Solution

#### Unlocking Flexibility with Icron

The turning point came with the discovery of the Icron 2.0 Ranger 2304PoE, with its ability to connect and extend USB 2.0 devices across a Power over Ethernet (PoE) enabled Gigabit Ethernet Local Area Network (LAN) using existing cabling. This eliminated the need for expensive electrical installations at the camera location. Its network functionality allowed the host computer to be located anywhere on the network, overcoming distance limitations that plagued previous solutions. A true game-changer!

This innovative approach addressed all these challenges simultaneously.

**Reduced costs**

Eliminated the need for expensive electrical installations at camera locations, reducing overall costs.

**Enhanced Flexibility**

Allowed the host computer to be placed anywhere on the network, overcoming distance limitations.

**Seamless Integration**

Preserved user experience by enabling full functionality of the preferred Aver Cam520 Pro PTZ camera over the network.

**Simplified Setup**

Utilized existing cabling, eliminating the need for additional power and cabling runs.

“The Icron solution was a game-changer for the Kraken Community Iceplex 32 Bar & Grill. We can now put the PC anywhere thanks to the extended USB reach, eliminating distance limitations and ensuring smooth video conferencing. Plus, the zero-by connection is fantastic for meetings – no more dropped calls or choppy video! And the best part is we can even add another camera without worrying about expensive electrical work. It's a win-win for us!”

Sean Rawlins  
Director of Technology, Seattle Kraken

**Conclusion**

#### Meetings Made Easy

The Icron USB 2.0 Ranger 2304PoE extender proved to be a cost-effective and most efficient solution for the Kraken Community Iceplex 32 Bar & Grill. Implementing Icron's USB extension solution over a PoE-enabled LAN not only solved immediate technical challenges but also revolutionized the meeting experience by providing a seamless solution that helped transform their restaurant into a fully functional Zoom Room. This facility can now cater to the increasing demand for virtual and hybrid meetings without any equipment glitches.

## Reimagine Credit Decision Making

Cost effectively expand your loan book with less risk

INFOSHEET

**The JUDI.AI solution**

With JUDI.AI, lenders can extend various types of loans to members and businesses – large and small within minutes versus days. Our real-time credit assessment platform augments business rules with machine learning to drive automation of the entire loans approval process.

JUDI.AI has changed the way we do business. We've been able to improve our processes significantly which is a real win for our members. In a year and a half, we've done over \$20M in small business loans.

Ken Lim  
Process Enhancement Manager  
Vantiva

**Create the ultimate member experience**

- Instant credit decisions made online or in person.
- A streamlined funding experience leads to higher satisfaction with your services.
- Businesses can be launched or continue to grow with faster access to financing.

**Rapid and flexible deployment**

- Ultra-secure solution that scales with your business.
- Seamlessly integrates into your existing technology infrastructure.
- A highly configurable, white-labelled solution that can go-live within weeks.

**Save time with automated risk analysis**

- Automation of manual processes in the loan decisioning workflow.
- Simultaneous review of real-time bank data, credit bureau results, KYC/AML, and our proprietary firmographic iROS™ score.
- 10+ million aggregated data points powers our credit engine, for assurance that loan decisions are based on years of risk management experience.

**More transparent credit decisions**

- Incorporates your financial institution's existing risk tolerance and credit policies.
- Leverages our machine learning algorithms to provide better credit decisions.

## Synergistic Advantages of Private Cellular and Mesh

Secure, Flexible, and Reliable Connectivity for Enterprise, Industrial, Agricultural, and Outdoor Applications

This whitepaper covers:

- Reliable Connectivity:** Private cellular networks deliver secure, high-performance connectivity for industries like manufacturing, logistics, and agriculture.
- Mesh Technology:** GXC's patented cellular mesh increases coverage and reliability while reducing costs by extending connectivity up to two miles.
- Wi-Fi Comparison:** Private cellular outperforms Wi-Fi with better coverage, higher security, low latency, and support for more devices.
- Tech Options:** GXC ONYX supports 4G LTE and 5G with seamless upgrades, providing future-proof network solutions.
- Use Cases:** Improves connectivity for agriculture research centers, distribution centers, and mobile deployments.
- Cost Savings:** Mesh technology reduces construction and operational costs compared to traditional Wi-Fi or wired networks.

## Discover the Ease of Private Wireless with a GXC ONYX Starter Kit

**Instant Deployment for Seamless Network Management**

Designed to swiftly conquer the complexities of today's fast-paced sectors, GXC ONYX Starter Kits offer a seamless solution to your network challenges. With instant deployment, comprehensive management, and unmatched security features, this quick setup offers a powerful punch, enabling advanced devices and services, like automation and operational efficiencies that require robust, reliable connectivity.

**Mobile LTE Starter Kit**

**Includes:**

- 1 x GXC Indoor Access Point (ISAP)
- 1 x ONYX Edge (on Dell 3200)
- ONYX Connect software\*
- Physical SIMs and eSIMs
- Printer case
- Cables included (Internet connection required)

## Industrial Manufacturing

Bring AI applications and Autonomy to industrial operations by using GXC's Private 5G network, Connect sensors, robots, forklifts, autonomous vehicles, compute, GPU, controller, digital twins with 5G ultra-reliable, high-throughput low-latency features. With enhanced security and significant cost savings, Private 5G is the optimal choice over traditional Wi-Fi.

### Transform Your Factory Into A Smart, Autonomous Facility

Step into the future of industrial automation with GXC's Private 5G network, transforming traditional factories into smart, autonomous environments. As the foundation for the next wave of industrial evolution, our Private 5G solution enables seamless integration of IoT and AI technologies. These networks enhance operational efficiency and enable full automation of complex manufacturing processes, driving industries toward a connected and autonomous future.

**Enhanced Connectivity**

GXC's Private 5G networks ensure ultra-reliable, low-latency connectivity for seamless AI integration and autonomous operations. This robust infrastructure supports the continuous use of IoT-driven machines, enhancing efficiency across large industrial settings.

**Superior Security**

Secure your sensitive industrial data with GXC's Private 5G networks, featuring advanced encryption and robust access controls to protect against cyber threats and unauthorized access.

**Cost Effective Solution**

Achieve lower total cost of ownership and enhanced ROI with GXC's Private 5G. These solutions are not only more cost-effective to implement but also maintain lower operational costs than traditional Wi-Fi.

### Customer Need

**Enhanced Connectivity**

GXC's Private 5G networks ensure ultra-reliable, low-latency connectivity for seamless AI integration and autonomous operations. This robust infrastructure supports the continuous use of IoT-driven machines, enhancing efficiency across large industrial settings.

**Superior Security**

Secure your sensitive industrial data with GXC's Private 5G networks, featuring advanced encryption and robust access controls to protect against cyber threats and unauthorized access.

**Cost Effective Solution**

Achieve lower total cost of ownership and enhanced ROI with GXC's Private 5G. These solutions are not only more cost-effective to implement but also maintain lower operational costs than traditional Wi-Fi.

### Boost Efficiency And Security In Industrial Manufacturing

Discover more about how GXC's Private 5G Networks can transform your manufacturing process. [Read More](#)

### Added Benefits

**Scalability And Flexibility**

As your business grows, so do your connectivity needs. GXC's Private 5G networks are designed to scale effortlessly with your operations, supporting an increasing number of IoT devices and automation processes without losing performance.

**Industry 4.0 Readiness**

Embrace the future of manufacturing with a network that's built for Industry 4.0. Our solutions enable seamless integration of AI, robotics, and IoT technologies, driving innovation and productivity in your manufacturing processes.

**Reliable Performance**

With GXC's Private 5G, downtime is a thing of the past. Our networks are tailored to handle the heavy data loads and high-speed demands of modern manufacturing, ensuring continuous operation and real-time response capabilities.

### Industrial Manufacturing Use Cases

Real-time machine monitoring and control

Predictive maintenance and diagnostics

Wireless M2M communication and IoT integration

AR assisted maintenance and training

Integration with the Warehouse Management System

Video surveillance and analytics

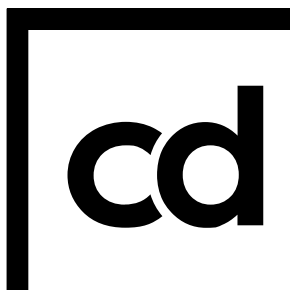

Digital twin simulations

Enhanced network resiliency and redundancy

Network segmentation for sensitive information

Worker training and onboarding

# HP Anyware

## Secured Access to Digital Workspaces

Hybrid workforces need the freedom to create, collaborate and work securely from virtually anywhere. That's where digital workspaces come in.

HP Anyware is a high-performance software solution to transform PCs and workstations into digital workspaces or to provide users access to their virtual environments hosted on a server or in the cloud from virtually any device.

Products Industries Resources [Connect with us](#)

### No data leaves your network

HP Anyware streams highly interactive desktop displays between virtually any host and end-user device.

Enhance productivity, streamline workflows, and improve employee satisfaction while maintaining data security and compliance.

#### Anyware Standard

Unlock the productivity of your hybrid workforce with HP Anyware Standard. Built for everyday workloads running on standard CPUs, this software subscription seamlessly connects knowledge workers to their remote or virtual desktops no matter where they work – in the office, at home, or on-the-go.

Includes Anyware Standard Agent for CPU-only host desktops: Windows, Linux

#### Anyware Professional

Unlock the power of your designers, engineers and data scientists with HP Anyware Professional. Designed for graphics- or data-intensive workloads requiring GPUs, this software subscription seamlessly connects users to their remote or virtual workstations no matter where they work.

Includes Anyware Graphics Agent for GPU-enabled host desktops: Windows, Linux, macOS

## Seeing is Believing

Only PCoIP® technology is trusted by security-minded, performance-driven organizations to deliver an outstanding user experience over the most challenging network conditions.

PCoIP Security | PCoIP Ultra Performance | PCoIP Products

### Not all display protocols are created equal

If you have ever accessed a remote workspace, you've experienced some kind of remote display protocol. Did you know that your experience is highly dependent on the protocol used?

PC-over-IP (PCoIP) technology delivers a secure, high-definition and highly responsive computing experience. It uses advanced display compression to allow users remote access to their on-premises workstations or virtual machine instances in local data centers or public clouds from a broad range of endpoint devices.

Other protocols offer additional local force feedback modes to overcome compression artifacts – these typically burden your network or your computer resources, resulting in throttled throughput and compromised interactivity.

But with PCoIP technology, there is little difference for the user between working with a local computer or from a remote endpoint receiving a PCoIP streamed pixel representation of their desktop and applications. And from an IT perspective, remote desktops are more secure as no data ever leaves the corporate environment.

### PCoIP Security

Because the PCoIP protocol transfers only display information in the form of pixels, no business information ever leaves your cloud, data center or workstation. In industries where collaboration is key, but data risk is high, our PCoIP protocol offers another layer of protection. People can work collaboratively from anywhere, knowing that sensitive information never leaves the data center and work can never be lost or stolen.

In addition, because enterprise data and software are safely secured inside central systems, no one can tamper with your data or software your applications by compromising your remote endpoint devices. Furthermore, PCoIP traffic is secured using AES 256 encryption, which meets the highest level of security required by governments.

**Encodes, compresses, encrypts, and transports**

Image pixels from a central server to workstation

**Decrypts and decompresses the image**

for users to interact with on any endpoint

**No business information ever leaves your secure cloud, data center or workstation**

### PCoIP Ultra® Performance

**Distortion-Free**

The PCoIP protocol is designed for business support, which is critical for high-performance use cases such as medical diagnostics, geospatial analysis and media production.

**Color-Accurate**

PCoIP technology uses a fully reversible color space conversion, resulting in remote reproduction of image colors precisely as intended by graphics applications - no gamma shift required by users.

**Expanded Multi-Codec**

Your business is not one-size-fits-all, so don't choose a one-size-fits-all codec. PCoIP Technology ensures efficient delivery of any content to any endpoint, leveraging proven PCoIP encoders and third party codecs to meet the needs of IT architects and discerning users alike.

**Dynamic Network Adaptation**

The PCoIP protocol dynamically adapts to network conditions in real time. Adaptive encoders automatically deliver the best possible user experience under changing network conditions.

**Text Clarity**

Research has shown that specialized anti-aliasing techniques applied to display fonts are vital to word recognition, reading speed, comprehension and can even reduce mental fatigue.

Legacy protocols struggle with anti-aliased text such as Microsoft Word type or Adobe Type type, even when configured for high quality compression modes.

**Color Accuracy**

Some protocols are tied to chroma subsampled techniques such as YUV 4:2:0 compression which saves bandwidth by approximating the color of images delivered to your screen. Such inaccurate color reproduction is unacceptable in industries such as advertising, publishing or media and entertainment, exposing content creators to unproductive guesswork and increasing the adoption of remote computing. Meanwhile, other protocols that attempt color accuracy via manual business mode do so at the expense of compromised frame rates and high bandwidths and latency.

PCoIP's unique technology delivers accurate color and texture for any use case.

**CORPORATE CYBERSECURITY REPORT**

## Securing the Hybrid Workplace in 2022 and Beyond

**New Survey Finds Companies Are Turning Away from VPN in Favor of Zero Trust Architecture as Hybrid Workplaces Become the New Norm**

When organizations abruptly shifted to remote work during the COVID-19 pandemic, they had to scale their network and security capabilities quickly. That meant snap decisions for many companies, deploying more of what they were already using, likely taking some shortcuts that left optimizing security and user experience for another day.

A new survey targeting IT decision makers polled more than 8,000 respondents across a range of industries about the security challenges that were uncovered as companies moved to remote work. This report discusses those challenges and how companies are planning to increase security as hybrid work models mature and become the norm.

Download this free 13-page report to learn about the priorities that will help CSOs and IT staff protect corporate assets and enable a secure, productive and reliable hybrid workplace.

**DARTS HILL Garden Park**

Welcome About the Garden Visit the Garden Membership Donate News / Events Contact

# WELCOME TO DARTS HILL GARDEN

Darts Hill Garden is the result of over 75 years of work and dedication guided by the vision of Francisca Darts.

## ONE WOMAN'S VISION

Darts Hill Garden is the result of over 75 years of work and dedication guided by the clear vision of Francisca Darts. Along with her husband Edwin, Francisca took a logged piece of land, turned it first into an award-winning orchard and then into the unique garden that is Darts Hill today.

Francisca's curiosity and love of the new and interesting has resulted in the most diverse collection of mature trees and shrub species in the Pacific Northwest. Many were planted from seed collected from around the world.

In 1994 Edwin and Francisca Darts donated their 7.5-acre garden to the City of Surrey and its citizens. Their intention was to give Surrey its own garden to be used as a horticultural centre for the preservation, enhancement, and development of plants. The non-profit Darts Hill Garden Conservancy Trust Society works in partnership with the City of Surrey towards these goals.

### Visiting the Garden

For information about when to visit the garden, please click here.

### Membership

For information about memberships, please click here.

### Tours

For a truly customized experience, bring your own group of five or more for a two-hour Guided Tour, conducted by one of our experienced guides.

Pre-registration is required for all tours. Tour cost is \$5 per person. Visit our [tours](#) section to learn all you need to know about booking a Darts Hill Tour.

### Visiting with Children

Darts Hill Garden can be magical for children of all ages. They'll enjoy exploring the winding mossy pathways, going through "tree tunnels," and taking in the colors, sounds, and smells of the garden. They'll observe the variety and unique features of plants from around the world, learn to recognize our own Pacific Coast native plants, see honeybees and mason bees at work, and perhaps see a rabbit or other creature that inhabits the garden. It's a unique learning experience.

Parents are asked to supervise their children and teach them to stay on the pathways and respect the special plants in the garden. Bicycles, skateboards, roller balls, and similar items are not permitted in the Heritage Garden at Darts Hill Garden Park. Secure bike racks are available for your use. Ride your bike to the garden!

### Pets Policy

For information on the area policy, please click here.

Amplify Your Brand's Voice

# Craft Compelling Podcasts That Connect and Inspire

[Learn more](#)

## Welcome

Your Podcast in a Box is your ultimate partner in transforming business communication through the power of podcasting! In a world where attention spans are shrinking and competition is fierce, podcasts offer a fresh and impactful way to engage your audience. Our mission is to help businesses like yours create high-quality audio content that captivates listeners and fosters meaningful connections. With our expertise in tailored podcast production, we handle all the details, allowing you to focus on telling your story and expanding your reach. Let's embark on a journey where your voice becomes a powerful tool for engagement!

## Solutions and Value Propositions

### Comprehensive Podcast Production

We believe that great storytelling deserves exceptional production. Our team manages every step of the podcasting process, from brainstorming unique concepts to meticulous recording and seamless editing. With our support, you can focus on your message while we ensure a polished final product that resonates with your audience.

### Industry Expertise You Can Trust

With extensive experience in B2B podcasting across various sectors, we understand the nuances that set each industry apart. Our proven track record of producing successful podcasts for clients like HP and Sierra Wireless equips us with the insights needed to make your podcast a success.

### Bespoke Music and Professional Voiceovers

Your brand has a personality—let it shine through! We provide custom music compositions and professional voiceover services tailored to reflect your company's tone and ethos. Whether you need a warm, friendly touch or a sharp, corporate sound, we have you covered.

### SEO Strategy and Smart Tagging

Visibility is key in the digital realm. Our SEO experts optimize your podcast for search engines, enhancing discoverability and helping you reach your target audience effectively. With the right keywords, tags, and descriptions, your content will not only attract listeners but also engage them meaningfully.

## Benefits of Podcasting for Your Company

### Enhanced Communication and Accessibility

Podcasts provide a versatile platform to share updates, insights, and stories both internally and externally, allowing your message to reach listeners wherever they are. Employees can stay informed on policy changes, and clients can engage with product launches—all in a convenient, on-demand format.

### Deepened Engagement Through Storytelling

With the power of storytelling and relatable content, podcasts capture listener attention in an era of distraction. They're a great way to convey complex ideas in digestible formats, encouraging listeners to return for each episode.

### Positioning as an Industry Leader

Share valuable insights and expert opinions to build your brand's authority. This fosters trust and loyalty, positioning your company as a thought leader that audiences turn to for credible information and trends.

### Enduring Impact and Long-lasting Reach

Each podcast episode continues to attract new listeners over time, creating an evergreen resource for your audience. With strategic marketing, your podcast can generate lasting value, extending the reach of your message well beyond its initial release.

## ABOUT THE LEARNING CENTRE

The Shared Care Committee has supported more than 450 physician-led collaborative projects across BC since 2016.

The purpose of this Learning Centre is to share knowledge about 'Quality Impact' projects to encourage involvement and the spread of success.

The Learning Centre also aims to make project planning a little quicker with practical tools and resources.

The Shared Care Committee represents a partnership of Doctors of BC and the BC Government

© 2021 Shared Care | All rights reserved. About us Our Team Project Tools [www.sharedcarebc.ca](#)

Doctors of BC acknowledges that our organization is located on the traditional, ancestral, and unceded territories of the Coast Salish peoples, including the Musqueam, Squamish, and Tsleil-Waututh Nations, whose strong relationship with their territories continues today. Our employees, who are located throughout BC, work and live on many different Indigenous territories throughout the province.

Acknowledging that we are on the traditional territories of First Nations communities is an expression of cultural humility and involves recognizing our duty and desire to support the provision of culturally safe care to First Nations, Inuit, and Métis people in BC.
